

**Product Description**

AntiBlu® M6 provides effective control of sapstain and mold on freshly sawn and seasoned wood products through a proprietary formulation containing the active ingredient propiconazole.

Propiconazole is commonly used for treatment of wood and agriculture products against a broad spectrum of decay organisms.

**Product Use\***

AntiBlu® M6 is part of the AntiBlu® product line from Arxada. AntiBlu® M6 is an enhanced formulation for control of sapstain, mold, and decay fungi in wood products such as freshly sawn and kiln-dried lumber, as well as seasoned logs, poles, posts. It is intended for sawmills, exporters, log home truss manufacturers, and utility pole manufacturers and other timber operations seeking effective anti-sapstain and related products from a single, service-oriented supplier.

**Product Storage**

Store in a cool, well-ventilated storage area. Temperatures exceeding 104° F may cause product decomposition. Store in original container only in locked place out of reach of children. Keep from freezing.

**Product Disposal**

Pesticide wastes are hazardous; improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of according to instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**Product Contents**

ACTIVE INGREDIENTS:

Propiconazole	6.0%
---------------	------

OTHER INGREDIENTS:	94.0%
--------------------	-------

TOTAL	100.0%
-------	--------

**Container Disposal**

Do not refill or reuse empty container. Triple rinse container and then offer for recycling or reconditioning. If not available, puncture and dispose in a sanitary landfill.

**Safety Recommendations**

Mixers and loaders handling Antibl® M6 concentrate must be properly trained and wear coveralls over a long-sleeved shirt and long pants, chemical resistant gloves, footwear and socks, goggles and face shield. In poorly ventilated areas, a NIOSH-approved respirator with an OV cartridge and P, R, or N Filter cartridge is required.

Dilute solutions and treated materials should be handled by properly trained personnel wearing long-sleeve shirts, pants and chemical resistant gloves.

Users should wash hands before eating, drinking, using tobacco, or using restrooms. Remove clothing immediately if pesticide gets inside, then wash thoroughly and put on clean clothing. Wash the outside of gloves before removing.

\*Consult the product label and SDS for complete directions and safety information prior to using AntiBlu® M6 or any other pesticide product.

## Directions for Use

Do not apply this product in a way that will contact workers or other persons either directly or through drift.

## Application

AntiBlu® M6 may be applied to wood and wood products by immersion or spray methods according to the dilutions provided below. Dilution levels may vary widely and will depend on application methods, wood species, seasonal changes in exposure conditions, length of protection desired, and wood storage and transport conditions.

For spray applications:

Mix one gallon of AntiBlu® M6 to 10-40 gallons of water.

For immersion applications:

Mix one gallon of AntiBlu® M6 to 25-125 gallons of water.

Best Results

For best results, apply AntiBlu® M6 immediately after cutting or sawing wood products. Treatment delays greater than 24 hours can result in mold growth on fresh sawn wood. This may result in the need for higher solution concentrations to gain control.

## Available Sizes

AntiBlu® M6 is available in 257 gallon totes (900 kg).

## In Case of Emergency

In case of chemical emergency call CHEMTREC at 1-800-424-9300 (Contract Number 864796), or call our EH&S department at 678-624-5800 during normal business hours.

## Frequently Asked Questions

### 1. What products are included in the AntiBlu® product line?

In addition to AntiBlu® sapstain control products, the AntiBlu® line includes defoamers, brighteners, insecticides, end sealers, and colorants. See [wolmanizedwood.com](http://wolmanizedwood.com) for more information on these products.

### 2. Do these products work for hardwoods and softwoods?

Yes, there could be differences for specific applications, but the AntiBlu® line has products that cover both hardwoods and softwoods, as well as lumber and logs.

### 3. Why should I have confidence in these products?

The AntiBlu® line of wood protection products has a well-established history of successful sapstain control in North America and throughout the world. Its active ingredients are used for surface treatments in the Americas, Europe, as well as Australia and New Zealand. AntiBlu® products are produced and sold by Arxada, licensor of the Wolmanized® brand and established experts in wood protection. With manufacturing operations in North America, Europe, Africa, and Asia Pacific, a joint venture in South America, and laboratories in the United States and England, Arxada offers unsurpassed expertise in wood preservation technology.

### 4. Who should I contact if I have a problem with worker exposure or spills?

Call: CHEMTREC 1-800-424-9300 [CCN 864796].

### 5. Who should I contact for additional information?
